Sambulosithole12@.com 

Motivated ICT student with a strong foundation in programming, computer networking, and web technologies. Passionate about using technology to solve real-world problems, including innovative projects like a wearable GBV safety wristband and GPS-based delivery tracking systems. A disciplined, driven problem-solver with strong teamwork and communication skills, focused on using technology to create real impact.

Experience

2025 - PRESENT

Co-Founder & Developer/Cipher Syndicate (Tech Startup), Durban, South Africa

- Co-founded a tech startup focused on website and application development.
- Collaborated with a team with our team of developers to build the company website.
- Applied front-end and back-end skills to create a functional and visually appealing website.

2025-PRESENT

Independent projects/Durban, South Africa

- GPS Delivery Tracking system (ongoing): Developing a GPS-based software for managing delivery fleets effectively and efficiently.
- Wearable GBV Safety Wristband (ongoing): Developing and designing a wearable device with a panic button function, which will be linked to a mobile phone for added safety measures.
- Siyavaya Delivery Service (ongoing): Founded a delivery platform that addresses some of the challenges that are faced in South Africa. Siyavaya is an affordable and reliable delivery system specifically for communities that are located some distance from groceries, fast food and others services.
